Testimonial **Martin Langford** **1 2 Call Worksafe**

After using Martin previously to help with Health and Safety for the company and receiving a great service, I did not hesitate to book my employee onto the Asbestos awareness course.

Martin gave me plenty of notice on the course dates which made it easier to book a morning to attend the course. After attending the course my employee returned to work singing martin praises as he had learnt a lot of useful information on the dangers present on sites we attend making him think twice about his actions whilst at work.

The course was instructed in such way as not to preach about the risks but inform in such way that the attention was never lost as the feedback I received from my employee was very positive and up beat.

I will now be booking myself and others on the course and would highly recommend this to anyone.
